

Aim of the project

The aim of WOT project is to promote inclusive entrepreneurship for people with disabilities by developing a methodology based on job shadowing, mentoring and coaching of people with physical disabilities willing to become entrepreneurs or freelances.

Mentoring will be carried out on the workplace preferably by entrepreneurs and freelances with a physical disability, coaching by partners' staff. The desired outcome of the project is a number of people with physical disabilities will start a business or a freelance activity, or cooperating in managerial positions in already established business or consulting companies.

Duration of the project:
01.12.2016 – 31.05.2019

Work-based Entrepreneurship Training for People with Disabilities - WOT

WOT results:

1. Guide explaining mentoring disabled people for developing inclusive entrepreneurship
2. E-learning course on mentoring disabled people for developing inclusive entrepreneurship
3. Guide for disabled people on developing their own business or consultancy
4. E-learning course for disabled on developing their own business or consultancy

WOT trainings:

- Mobility of learners and trainers to Italy to exchange experiences and goals, to improve their English and to attend 30 hours of face to face lessons

WOT project addresses several needs of different target groups:

- the need of European disabled people to find an occupation, taking also advantage of inclusive entrepreneurship
- the need of VET trainers and VET organizations to support labor insertion of disabled people taking advantages of a number of approaches, including inclusive entrepreneurship, work based training, mentoring
- the need of the European Commission and of member states to rise the number and the rate of employed people in Europe, in general and for disabled people.

First partners meeting took place in Rzeszow on 17-18.01.2017. The main topics discussed were:

- how to structure different activities concerning management and monitoring and related tools
- risk analysis about the project
- how to structure valorization and related tools, including the half day conference to be carried out in M7 in every partner country to launch the pilot and recruiting participants
- how to structure version 1 of the IOs to be developed in the **following 6 months**

Next partners meeting: Paris 26-27.06.2017
