Project's Objectives

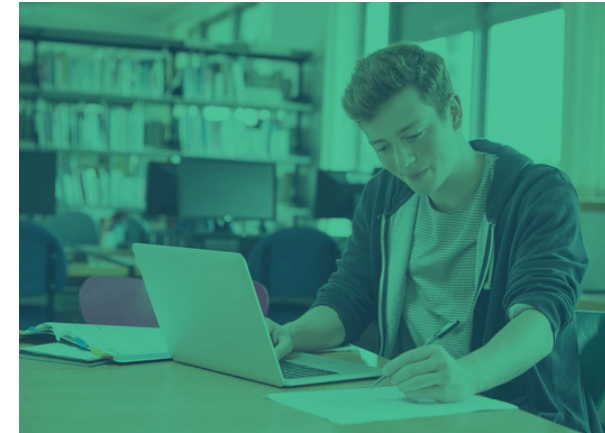

This project aims to strengthen the digital competence of Adult Education experts, enhance the quality of online learning experiences, and promote the effective use of digital technologies in education, in line with the **European Union's Digital Education Action Plan**.

The project's objectives are:

1. Recommend an online instructor profile employing EU policy instruments and framework
2. Actively engage beneficiaries and stakeholders in the project activities
3. Address systematically the instructional design process
4. Design and develop OERs focusing on delivering engaging and participatory online learning experiences
5. Upskill/reskill Adult education experts in terms of digital technologies and teaching methods
6. Transform educators to “design scientists” able to drive their own learning – digital transformation in terms of skills, attitudes and knowledge.
7. Recommendations for educational technologies on policy levels

The SOURCE project is all about:

1. Creating new, innovative or joint curricula or courses
2. Digital content, technologies and practices
3. New learning and teaching methods and approaches

Target Groups

The SOURCE project targets educators and instructors in online learning experiences. It will develop the curriculum based on three dimensions: Content, Technology, and Pedagogy, incorporating the six areas of the DigiCompEdu framework. Additionally, the project will collaborate with commercial entities to foster an entrepreneurial mindset and gain market insights into open and distance education.
